

Adrian Kaźmierczak: Publications of the Materials and Structure Laboratory's workers in "Materials Research Proceedings"

The journal "Materials Research Proceedings", issued by Materials Research Forum LLC, published the conference materials from "Terotechnology, 10th Conference of Terotechnology, 18-19 October 2017, Kielce, Poland" in Volume 5/2018.

The conference was organized by the Kielce University of Technology, the Polish Scientific and Technical Society for Maintenance and Targi Kielce – exhibition and conference centre. The conference book published, among others, ten articles written by the employees of the Materials and Structure Laboratory of the Railway Research Institute. The information presents summaries of these articles in Polish regarding railway problems in the field of material engineering and safety in rail transport.

Keywords: material engineering, construction safety, rail transport, hazards, research projects, railway infrastructure, fire safety, safety engineering
