

Agata Pomykała: Publication of Articles in MATEC Web of Conferences

The article presents information about articles written by the Railway Research Institute's employees, published in 2018 in the MATEC Web of Conferences online journal. The articles concern the results of recent research, related to the development of electric traction in rail transport. They are an extension of the presentations made during the 13th International Scientific Conference entitled "Modern Electric Transport" MET'2017.

Keywords: modern electrified transport, railway systems, conference MET2017
