

Janusz Poliński: International Railway Fair “EXPO 1520”, Scherbinka, Russia

The International Fair of Railway Equipment and Technologies EXPO 1520 (2019), is a conference and exhibition event dedicated to rolling stock held every two years for rolling stock on 1520 mm gauge tracks. In 2019, the Fair was organized on 28-31 August at Experimental Ring of JSC Russian Railway Research Institute (VNIIZhT), in Scherbinka near Moscow. Visitors were presented, among others, with the UG Sinara / Siemens ES2G series autonomous (driverless) electric train tested by the VNIIZhT Institute. This train transported around the Ring participants of the conference entitled “Digital Railway. The image of the Future”. A spectacular event was also the passage of some of the exposed traction vehicles along the test track of the Ring.
