Regarding: Recommendations regarding railway passenger rolling stock cybersecurity

Dear Sirs,

Polish ISAC-Kolej (the Polish railway subsector Information Sharing and Analysis Centre) has adopted in June 2023 “Recommendations regarding railway passenger rolling stock cybersecurity”.

Taking into account challenges related to cybersecurity of the railway system as well as the needs of the European common market of the railway products, including rolling stock, decision was made to prepare a bilingual edition of the recommendations for wider opening of cooperation keeping at the same time high railway safety & security and enhancing railway cybersecurity.

Please find attached complete bilingual edition of the “Recommendations regarding railway passenger rolling stock cybersecurity”, and feel free to make them publicly available for the benefit of the railway safety, security and cybersecurity.

*ISAC-Kolej President
Railway Research Institute deputy director*
